## *Custom Color*

- Customer can select a custom color specified by Pantone, RGB/CMYK or provide fabric sample to match color
- Color blocking, using a different color for each grill can be done as well

# SOUNDFREQ®

## *Custom Graphics / Patterns*

- A wide range of designs can be printed, see the examples of what works well. There is no issue with multiple colors or even fairly detailed graphics (see Flower Freq as a good example)
- It is possible to have graphics that are different on the top and bottom grills (see Flower Freq or Ocean as a good example)
- When fabric is assembled, it stretches and warps slightly unevenly, so any graphic or pattern that is based on straight lines, structured fonts or gridded patterns can be problematic. There is also a tolerance when assembling the fabric with registration of print on the grill is approximately +/- .25”
