

For over 10 years, Devialet's mission has been to make high-fidelity sound accessible to as many people as possible.

Phantom Reactor's various configuration options make it possible to transform any space — from the largest to the most intimate — into an immersive sensory experience. With Devialet's pure, ultra-dense sound, your clients will be transported to another world.

LET'S TAKE IT TO THE NEXT LEVEL.

Interested in installing Phantom Reactor Custom or Hotel Mode in your spaces ?

We'd love to hear from you:

**TECHNOLOGICALLY
FLAWLESS.**

Devialet's founding amplification invention, ADH®, delivers a remarkable sound quality and physical experience, without needing to crank the volume. Zero distortion, zero interference. Gone are the days of shouting over the music.

At the same time, SAM® and HBI® technologies enable Phantom Reactor to deliver an ultra-high bandwidth. For spaces that need a more powerful acoustic experience, the sound can now resonate more intensely. It's XXL emotion in an XXS package.
